

Physical/Chemical Mini Posters

Objective: Create a project that explains 1. Physical/Chemical properties and 2. Physical/Chemical changes showing your understanding of the properties of matter and which changes are physical/chemical.

- Pictures can be hand-drawn, from magazines, or taken from the internet – in color
- Must include a minimum of 3 physical properties of matter and 3 chemical properties of matter (there are more and you are welcome to include more) see [redacted] your textbook for help
- Must include 3 examples of physical change and 3 examples of evidence of a chemical change
- Must include the key points that physical changes do not change the substance and chemical changes always get a new substance
- 8th grade level work – pride shown in work
- Due at the beginning of the class period on Thursday, ~~10-27-16~~ 10-27-16

Turned in on time: ___/1 point

All 12 properties and examples shown: ___/12 points

Includes key points of physical and chemical changes: ___/2 points

Colored, nice looking, 8th grade level work (spelling, words, explanations, etc): ___/5 points

Total: ___/20 points
